

# Cocoon 48

## Retreat

### Cocoon 48 - Retreat

Cocoon 48 is our team activity-based meeting room. This is specifically designed for privacy in an open plan office environment. It can be customized to suit the diverse needs of many modern-day offices. The Cocoon 48 system is both a design feature for your office as well as being a functional acoustic sound barrier and provides an NRC rating of .70. Further privacy can be obtained in open plan situations by adding glass doors and sound masking options for complete discretion. Cocoon 48 may also be used as a sound absorbent partition system due to the steel internal frame. This allows monitors and desks, doorways and windows to be added as desired

Recycled Product

### Features
